**\$9,600\*** SBD/MO

**FREE**  
GOLD TV  
when you  
upgrade or  
sign up.

# Key features

## Fair Access Policy

FAP prevents abuse of the network and allows all users to have fair access to high speed Internet during peak hours (8am – 11pm) when Internet usage is at its highest.

If you reach your data allowance limit during peak hours, the JET speed is reduced to the base speed. Outside peak hours, it's a FREE Zone when data usage is not monitored or controlled and the Internet is always at JET speeds.

You can get back up to full speed by paying to reset your data allowance at <https://billing.satsol.tv/portal/login>.

## Strictly prepaid

JET plans are strictly prepaid, self-care plans with minimal additional features, which helps keep prices low. However, you have full transparency of your account (speeds, data usage, transaction history etc) at any time by logging into the customer portal.

Extra data during peak hours can be purchased if required from the customer portal – using tokens. Unused data is not transferred to the next day.

## Free install for 12-month contracts

Install is usually \$1,000 SBD. SATSOL retains ownership of the equipment – so we can upgrade you at any time at no extra cost.

## Free Wi-Fi router

## Free Gold TV package

Sign up, or upgrade your existing account to JET 4 or JET X and you'll be able to access all 35 channels available for free!
